National Conference on :

Mechanical Industries in Algeria

الملتقى الوطني حول الصناعات الميكانيكية في الجزائر

Organised by the Laboratory CEMSM

Objectives

The National Conference on Mechanical Industries in Algeria is a scientific event dedicated to the analysis and development of the mechanical engineering sector in Algeria. It brings together researchers, academics, engineers, and industry professionals to discuss technological advancements, current challenges, and future prospects in the field. The conference's primary objectives are to promote innovation, strengthen collaboration between academia and industry, and encourage technology transfer. Topics covered include mechanical design, manufacturing processes, industrial maintenance, automation, and the integration of new technologies such as Industry 4.0. Furthermore, this event serves as a platform for exchanging experiences and sharing knowledge, thereby contributing to the sustainable development and modernization of the mechanical engineering industries in Algeria .
